

Muhammad Faiz Annabil

Game Programmer

Profile

A highly motivated student with a strong passion for Software Development, particularly in Game Development and Web Development. Gained proficiency in Fullstack (NextJS) and backend (NestJS) web development through school projects and experienced in game development using Unity, including participation in the MAGE X Game Development Competition. Demonstrated ability to apply logic and problem-solving skills to create innovative solutions.

Experience

Backend Mentor at MokletDev, KOTA MALANG

January 2025 – Present

Mentored participants in backend development, covering API design, database management, and system architecture through code reviews and technical guidance.

Frontend Developer at Mokletdev, KOTA MALANG

October 2024 – Present

Developed user interfaces and enhanced user experience as part of the METIC front-end team.

Project

Personal Website

Creating Personal Website that is contain all of my info, projects, tech stacks, and certifications. This website is created using NextJS and Tailwindcss.

Cat Management System

Developed a Cat Management System, taking on backend development responsibilities and leveraging NextJS for full-stack implementation.

Education

Telkom Vocational High School, KOTA MALANG

July 2023 – Present

- **METIC:** Frontend Developer
- **Mokletdev:** Developed Websites using NextJS(full-stack) and NestJS (Backend). Provided backend development training to junior students
- **Game Development Projects:** Finalist in MAGE X Game Development Competition with "GETAWAY" (Unity)
